Notice Regarding Capital Investment

Neturen Co., Ltd. (the "Company") hereby announces that its Board of Directors resolved at a meeting held on August 6, 2026, to make a capital investment as described below.

1. Purpose of Capital Investment

Based on IH (Induction Heating) technology, the Company Group manufactures and sells metal products and induction heating equipment, and offers contract heat treatment services for various industries.

Fiscal year 2026 is the final year of the 16th Medium-Term Management Plan, which represents Phase 2 of the Long-Term Management Vision "NETUREN VISION 2030 (Evolution and Breakthrough)." During this period, the Group is focusing on "Creation of Growth Drivers," "Fostering Growth Engines," "Expansion in Global Markets," and "Fostering Human Resources with Voluntary Commitment."

In recent years, soaring construction costs have become a major issue in the industry, inducing strong demand from general contractors and developers for cost -saving structural components.

In response to these demands, the Company intends to promote its proprietary product "DOUBLE STARK®"*, which utilizes unique technology that creates normal-strength and high-strength sections within a single rebar at any desired location. This enables high-strength sections to be placed precisely where needed. The product has received high acclaim because it brings significant cost reductions—such as reducing the required volume of rebar, narrowing beam widths, reducing labor hours, and shortening construction periods—while simultaneously offering excellent seismic performance. Consequently, inquiries for the product have been rapidly increasing, particularly for logistics warehouses and data centers.

To meet this surging demand, the Company has decided to install new manufacturing equipment (cutting and marking equipment) at its Iwaki Plant (Iwaki City, Fukushima Prefecture), which is responsible for manufacturing “DOUBLE STARK®”. With the operation of this new equipment, the plant's production capacity for this product is expected to be doubled, enabling the Company to meet anticipated future demand.

※"DOUBLE STARK®" is a deformed bar for reinforced concrete, produced in accordance with JIS G 3112, featuring localized high strength in target areas achieved through induction heat treatment. The Company won the 2018 "SUPER" MONOZUKURI Innovative Parts and Components Award (sponsored by the Monodzukuri Nippon Conference and Nikkan Kogyo Shimbun) for this product.

2. Details of Capital Investment

(1)	Location	24-1 Yoshima Industrial Park, Iwaki City, Fukushima Prefecture (Iwaki Plant, Manufacturing Dept., Products Division)
(2)	Investment Details	Product cutting and marking equipment (for DOUBLE STARK®)
(3)	Planned Investment Amount	Approx. 150 million yen
(4)	Financing Method	Self-financed
(5)	Scheduled Commencement of Operation	July 2027 (planned)

3. Future Outlook

The impact of this investment on the Company's consolidated financial results for the fiscal year ending March 31, 2027, is expected to be negligible.
